Making Life Better

PRODUCT DESIGN ETHOS

- + Our material choices and product design features are focused on ensuring the longevity and sustainability of each product.
- + We prioritise craftsmanship over mass-produced, machine-made parts and choose to handcraft where it enhances and improves the product.
- + The product design process carefully balances the demands of manufacturing and fabrication with consumer expectations for functionality and aesthetics.
- + Our seamless design approach ensures that what's hidden is just as important as what's visible, and we do not compromise on areas that aren't immediately seen.
- + Our products are built for strength and durability, with no built-in obsolescence, and come with a guarantee for long lasting performance.
- + We use anti-vandal materials, design features, and manufacturing methods to protect against vandalism.

KEY SELLING POINTS

+ PRODUCT FEATURES

- + Australian-made. All products are manufactured locally in our facility based in Yatala, QLD and are distributed nationally.
- + All drinking fountains are Watermark-certified
- + ISO Quality Management System certified
- + Vandal resistant
- + Disabled accessible options
- + Product branding options
- + Choose from Dulux's full powder coat colour range
- + Customisation of standard products allowed
- + Full custom design service available
- + Service, Maintenance and Refurbishment services offered
- + Product leasing opportunity

CF400 SERIES

Ideal for Junior Schools, Senior Schools
and Sports Clubs

WHY CHOOSE THE CF400?

Urban+ designed and launched the CF400 chilled hydration station to meet the needs and requirements of schools and sporting clubs. Built with sustainability and circularity in mind, it reflects our commitment to integrating circular economy principles across our business.

The CF400 blends modern aesthetics with durability and easy maintenance. Constructed primarily from marine-grade 316 stainless steel, it is designed to withstand all weather conditions while maintaining its performance and appearance. Beyond its functionality, the CF400 is built for longevity, with a design that allows for easy refurbishment, repurposing, or recycling at the end of its service life.

Our tapware is specifically engineered for continuous, heavy use. Featuring reinforced collars and integrated security measures, it is built to resist wear, misuse, and vandalism, ensuring long-term reliability in demanding environments.

The CF400 comes with a variety of options including wall mounted, floor mounted, with or without chilling capacity, premium signage, additional side basin access to meet AS1428 requirements and the choice to have only 1, 2 or 3 tap/bubbler combinations.

NOT SURE WHAT TO CHOOSE?

Selecting the right drinking fountain and bottle filler for your school, club, or outdoor community space can be a surprisingly complex task. With so many styles, materials, and features to consider, it's crucial to focus on factors like durability, accessibility, and long-term use. Choosing a well-constructed fountain or bottle filler to not only withstands daily use and tough environmental conditions but also that considers all users, including children and individuals with disabilities.

At Urban, we've spent the past 20 years helping clients navigate this selection process. Our expert team understands that choosing the perfect drinking fountain or bottle filler involves more than just picking a model off the shelf—it requires a comprehensive approach. From assessing the space and identifying specific needs, to addressing local regulations and providing end-to-end support, we're here to simplify every step. We also offer ongoing assistance after purchase, ensuring your water solutions remain reliable and accessible.

With our extensive experience and personalised service, we'll make certain you get exactly what you need—and that the final result is a safe, durable, sustainable hydration solution for everyone.

URBAN FOUNTAINS & FURNITURE

Making Life Better

DO YOU NEED TO BUY NEW?

+ AS PART OF OUR COMMITMENT TO CUSTOMERS, URBAN+ ALWAYS ASKS, DO YOU NEED TO BUY NEW?

Most schools still have reasonable, functioning hardware that can still be used when upgrading their facilities. It is often more cost effective, time efficient and environmentally friendly to retrofit existing units with upgraded hardware than to throw them in to the waste and start anew. Urban+ is able to offer a complete range of solutions from retrofitting existing hardware, improving and upgrading facilities, to offering a new purpose designed solution for your school.

Need more bottle fillers?

Utilising existing troughs with bubblers only, Urban can install a bottle filler strip to add instant refill solutions utilising the existing plumbing and drainage.

Solution 1

Need chilled water?

Utilising existing troughs and bubblers, Urban can install a chiller unit to chill existing water bubblers. Why not add some bottle refill strips at the same time to maximise the use of your chiller, while still utilising existing plumbing and drainage and minimising the civil works..

Solution 2

Need vandal resistant tapware?

If you have a small existing chilled unit that has a broken goose neck bottle filler. Urban can add a strong, single tap bottle filler using your existing chiller unit to keep it working for years to come.

Solution 3

HYDRATION SOLUTIONS FOR SCHOOLS & CLUBS

Wall Mounted Multi - Strips

+ BF200 Wall Mounted Bottle Refill Single Tap

FEATURES

The BF200WM wall-mounted single-tap bottle refill unit offers a cost-effective upgrade by installing above existing water bubblers.

It's an ideal solution for replacing broken gooseneck bottle fillers, keeping your chilled unit functional for years to come.

- + push and fill functionality
- + spring loaded auto shutoff
- + designed to reduce water waste
- + ideal for placement above existing bubbler systems
- + made from high quality stainless steel
- + vandal resistant

OPTIONS

- + "Refill" Plaque
- + Artwork - Logo/Laser etching
- + Optional chiller unit

DIMENSIONS

- + Total Height: 155mm

+ SKU: DF_BF200WMS

+ BF200WM Wall Mounted Bottle Refill Multi Strip

FEATURES

Our BF200WM refill strips can be retrofitted to existing drinking troughs to offer a safe and hygienic alternative to standard bubblers.

- + push and fill functionality
- + spring loaded auto shutoff
- + designed to reduce water waste
- + ideal for placement above existing bubbler systems
- + made from high quality stainless steel
- + vandal resistant

CF400 SERIES

Meet Our Chiller Unit

Refrigerated Water Chiller to suit a 3 tap school drinking trough

These refrigerated water coolers are designed to be installed underneath a school drinking trough. It can be installed along with a new drinking trough or can be fitted underneath an existing drinking trough thus saving on the cost purchasing new troughs, faucets and plumbing installation.

Description and Features

- + This is a wall mounted refrigerated water chiller.
- + It must be mounted horizontally.
- + Must not be installed inside a cupboard or an enclosed space.
- + This water cooler is fitted with a low ambient temperature control to help prevent the refrigeration system from running in cooler weather (21 degrees C or below) and extending the life of the refrigeration system. *Children don't need to be drinking cold water when the outside temperature is below 21 degrees C.*
- + All the electrical wiring is double insulated.
- + All water lines and fittings are insulated to prevent condensation.
- + Has a 10amp power plug top.
- + Will produce approximately 72 litres of cold water per hour.
- + Water fittings 15mm female thread (water in and water out).
- + Maximum working water pressure 700kpa.

URBAN FOUNTAINS & FURNITURE

Making Life Better

VANDALISM PROTECTION & WARRANTY

Urban + has been designing and manufacturing drinking fountains for over 20 years, specialising in durable solutions built to withstand all weather conditions and high-traffic environments. With extensive experience in creating fountains for vandal-prone areas, we design our products to be robust and resilient. While no design can completely prevent damage from determined vandals, our high-strength construction significantly reduces the risk of serious or lasting harm.

Key Features to Prevent Vandalism:

+ Material Thickness: We use the thickest materials possible while maintaining aesthetic appeal to ensure robustness.

+ Secure Tapware: All custom-designed tapware is secured with additional mounting collars, which are fully fillet-welded internally to resist any attempts at forced removal. For added durability, reinforced stainless steel bars are incorporated to prevent intentional damage and breakage, ensuring long-lasting performance.

+ Hidden Fixings: We minimise visible external screws, with most fixings concealed internally for a cleaner, more secure design. Any necessary external fixings are equipped with security screws to deter unauthorised tampering.

Warranty

All our fountains are proudly designed and manufactured in Australia, showcasing our commitment to quality craftsmanship and exceptional customer service. We offer comprehensive support, including assistance with installation inquiries, after-sales service, and replacement parts if needed.

Built for long-term durability, each unit undergoes rigorous quality control and water testing before dispatch. Most plumbing fittings are standard and readily available at plumbing stores, while Urban Valves and bottle fillers can be sourced directly from our factory.

We stand by our products with a standard 2-year warranty on all manufactured and plumbing components, and our fountains are designed to last over 15 years with proper care and maintenance.

ABOUT URBAN+ FOUNTAINS & FURNITURE

+ COMPANY HISTORY

+ Urban was founded in 2001 by husband-and-wife team Gary and Claire Allan, who recognised an opportunity to create durable and timeless street and park furniture.

+ Urban+ operated for 18 years on respect, reputation, and strong working relationships.

+ In 2019 Simon Higgins was brought on as a business partner and helped define Urban+'s purpose to support the shift to a circular economy.

+ Urban+ now integrates circular thinking into every aspect of its business and manufacturing processes, driving the shift towards a truly sustainable Australian manufacturing industry.

URBAN FOUNTAINS & FURNITURE

Making Life Better

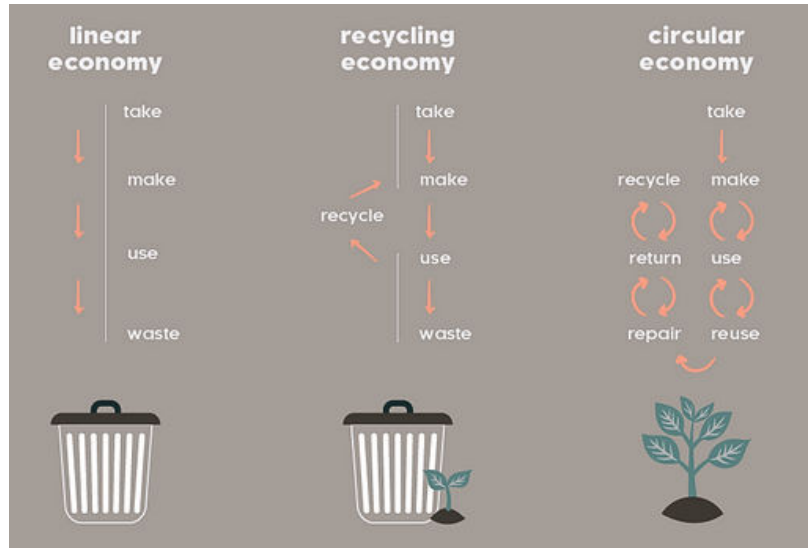

WHAT IS THE CIRCULAR ECONOMY?

+ THE CIRCULAR ECONOMY EXPLAINED

The concept of a Circular Economy gained traction in the 1970s, describing a system that minimises waste and pollution while keeping materials in use for as long as possible.

This approach stands in sharp contrast to the traditional "linear" or "take-make-waste" model, which depletes natural resources and harms ecosystems worldwide.

At Urban+, we combine exceptional design with sustainability. Our commitment to a circular economy ensures our products are visually striking, durable, and eco-friendly. By emphasising craftsmanship, we create innovative solutions that enhance public spaces and minimise waste for a sustainable future.
