Light Reflectance Value (LRV): The total amount of visible light reflected from the coating, expressed as a percentage of total incoming light. Surfaces with higher light reflectance values appear lighter while surfaces with low light reflectance values appear darker.

Specular Light Reflectance: The portion of incoming light that is reflected such that the reflected ray is at the same angle to the surface normal as the incoming ray. Specular light reflection is expressed as a percentage of total incoming light. Surfaces with a lower specular reflection produce less glare as they scatter or absorb a greater portion of the incoming light.

For further information on light reflectivity visit duluxpowders.com.au/spec-solutions

Architectural Colour Selector

***INCLUDED IN PRICE**

DURALLOY®
SOLID COLOUR RANGE

Popular solid colours including COLORBOND® steel colours delivered with warranty grade* advanced durable polyester thermosetting powder. Recommended usage includes exterior residential buildings less than 4 levels. See product suitability tables for more information.

† Project type definitions:

- Non habitable projects are those that are not dwelling types. Examples can be furniture, bus shelters, signage etc.
- Residential properties < 4 levels are typically easy to maintain, given their height and access.
- Light commercial projects < 4 levels are sheltered from neighbouring buildings, but require greater durability due to higher usage and wear.
- High rise residential and commercial projects are less sheltered from neighbouring buildings, raising their exposure and reducing their ease of maintenance.
- Prestigious commercial projects attract attention and require high quality finishes to uphold the longevity and design requirements.
- Monumental projects attract the most attention and have the highest standards required to uphold the reputation and protection expected from landmark sites.

* ADDITIONAL COSTS MAY APPLY

PROTEXTURE® TEXTURED RANGE

Highly mar and scuff resistant textured finishes built to protect, delivered with warranty grade* advanced highly durable polyester thermosetting powder. Recommended usage includes exterior residential and light commercial buildings less than 4 levels. See product suitability tables for more information.

Meeting Industry Standards

Dulux Duralloy, Precious and Protecture powder coat products are designed to meet both the global AAMA and Australian AS3715 standards for architectural aluminium finishes.

| | Duralloy | Precious | Protecture |
|----------------|-------------------|-------------------|--------------------------|
| AAMA Standards | Meets 2603 | Meets 2603 | Exceeds 2603 |
| Coating type | Durable Polyester | Durable Polyester | Highly Durable Polyester |

Project suitability

Ensure you specify the right Dulux powder coat product for your requirements by using the following table to help define your project by type and exposure conditions. Refer to our Premium Architectural Colour Selector card for our Premium range of products suitable for other project types and conditions.

Product Suitability by Project

| Project, Environment and Conditions | | | Top Coat Choice ² | | | |
|--|-------------|------------------------------|------------------------------|-----------------------|-------------------------|----------|
| Project Type [†] | Environment | Conditions ¹ | Duralloy ³ | Precious ³ | Protecture ⁴ | Alphatec |
| Light Commercial (< 4 levels) | Exterior | Mild (C2-C3), Severe (C4-C5) | | | ● | |
| Residential (< 4 levels) | Exterior | Severe (C4-C5) | | | ● | |
| Residential (< 4 levels) Non-Habitable | Exterior | Mild (C2-C3) | ● | ● | ● | |
| Habitable Non-Habitable All Projects | Exterior | Severe (C4-C5) | | | ● | |
| All Projects | Exterior | Mild (C2-C3) | ● | ● | ● | ○ |
| | Interior | Moderate Interior (C3-4) | | | ● | |
| | Interior | General Interior (C1-C2) | ● | ● | ● | ○ |

● Steel Shield and Alumi Shield Warranties available.

○ Non Warrantable.

1. For more information about project conditions, corrosivity zones and corrosion rates refer to duluxpowders.com.au/warranties

2. Primers may be required for perforated and expanded aluminium and steel applications depending on project conditions. For full system requirements refer to duluxpowders.com.au/warranties

3. Duralloy and Precious are only suitable for coastal, river and lake salt water environments >100m from the high tide and are NOT suitable in strongly acidic or caustic environments so the pH must be between 5 and 9

4. Protecture is only suitable for coastal, river and lake salt water environments >10m from the high tide and is NOT suitable in strongly acidic or caustic environments so the pH must be between 5 and 9.

For more information on specifying the right product for your project, call 13 24 99 or visit duluxpowders.com.au

Warranted Performance

All Dulux Duralloy, Precious and Protecture powder coat products are backed by product specific warranties on:

- Architectural aluminium, including perforated aluminium and expanded aluminium
- Mild steel, bright/semi bright steel, black steel and blue steel

| | Warranty | Duralloy | Precious | Protecture |
|------------------------|----------------------|----------------|----------------|----------------|
| Alumi Shield™ Warranty | Aluminium Durability | 10 Years | 10 Years | 15 Years |
| | Aluminium Colour | 10 Years | 10 Years | 15 Years |
| | Steel Corrosion | Up to 10 Years | Up to 10 Years | Up to 10 Years |
| Steel Shield™ Warranty | Steel Colour | 10 Years | 10 Years | 15 Years |

Warranties are made up of a colour warranty (for fade and chalking), durability warranty (film integrity for aluminium only), and corrosion warranty (for steel only). They are only valid when applied by a Dulux Accredited Powder Coater to the warranty specification on recommended project types and conditions.

For more information visit duluxpowders.com.au/warranties

Dulux Accredited Powder Coaters

Only Dulux Accredited Powder Coaters are able to issue our Dulux Alumi Shield™ and Steel Shield™ warranties after demonstrating their capability to meet stringent quality conditions and international standards.

For more information visit duluxpowders.com.au/accredited

CustomColour™

Our Architectural Colour Selector cards feature our range of stocked, readily available products and colours. If you cannot find the colour you require in a particular product, Dulux offer a premium CustomColour™ service. Call 13 24 99 or visit duluxpowders.com.au

Advice Line

Our dedicated consultants can help simplify the specification process, saving you time and money by providing the right coating advice for your project. Call 13 24 99 or visit duluxpowders.com.au

Kinetic® Technology is a process used to optimise the aesthetic effect of many of our pearlescent finishes. These finishes contain pearlescent and/or metallic pigments that produce a characteristic effect when bonded to powder particles. The process delivers a more consistent dispersion of particles across the surface resulting in a unique pearlescent or metallic lustre.

Light Reflectance Value (LRV): The total amount of visible light reflected from the coating, expressed as a percentage of total incoming light. Surfaces with higher light reflectance values appear lighter while surfaces with low light reflectance values appear darker.

Specular Light Reflectance: The portion of incoming light that is reflected such that the reflected ray is at the same angle to the surface normal as the incoming ray. Specular light reflection is expressed as a percentage of total incoming light. Surfaces with a lower specular reflection produce less glare as they scatter or absorb a greater portion of the incoming light.

For further information on light reflectivity visit duluxpowders.com.au/spec-solutions

† Project type definitions:

- Non-habitable projects are those that are not dwelling types. Examples can be furniture, bus shelters, signage etc.
- Residential properties < 4 levels are typically easy to maintain, given their height and access.
- Light commercial projects < 4 levels are sheltered from neighbouring buildings, but require greater durability due to higher usage and wear.
- High rise residential and commercial projects are less sheltered from neighbouring buildings, raising their exposure and reducing their ease of maintenance.
- Prestigious commercial projects attract attention and require high quality finishes to uphold the longevity and design requirements.
- Monumental projects attract the most attention and have the highest standards required to uphold the reputation and protection expected from landmark sites.

Worth doing, worth Dulux.®

Meeting Industry Standards

Dulux premium architectural powder coat products are designed to meet both the global AAMA and Australian AS3715 standards for architectural aluminium finishes.

| | Duratec | Charisma | Electro | Fluoroset |
|----------------|-------------------------|-------------------------|-------------------------|-----------------------------|
| AAMA Standards | Meets 2604 | Meets 2604 | Meets 2604 | Meets 2605 |
| Coating type | Super Durable Polyester | Super Durable Polyester | Super Durable Polyester | Ultra Durable Fluoropolymer |

Project suitability

Ensure you specify the right Dulux powder coat product for your requirements by using the following tables to help define your project by type and exposure conditions.

Product Suitability by Project

Project, Environment and Conditions

| Project Type† | Environment | Conditions‡ | Top Coat Choice² | | | |
|------------------------|--------------------------------|-----------------------------------|------------------|-----------|----------|------------|
| | | | Duratec³ | Charisma³ | Electro³ | Fluoroset⁴ |
| Monumental | Prestigious | Exterior | | | | ● |
| Commercial | Commercial (> 3 levels) | Exterior | ● | ● | ● | ● |
| Commercial | Light Commercial (< 4 levels) | Exterior | ● | ● | ● | ● |
| Residential | Residential (> 3 levels) | Exterior | ● | ● | ● | ● |
| Residential | Light Residential (< 4 levels) | Exterior | ● | ● | ● | ● |
| Habitable All Projects | Exterior | Mild (C2-C3), Severe (C4-C5) | ● | ● | ● | ● |
| | Exterior | Mild (C2-C3), Severe (C4-C5) | ● | ● | ● | ● |
| | Interior | General (C1-C2), Moderate (C3-C4) | ● | ● | ● | ● |

● Steel Shield and Alumi Shield Warranties available.

1. For more information about project conditions, corrosivity zones and corrosion rates refer to duluxpowders.com.au/warranties

2. Primers may be required for perforated and expanded aluminium depending on project conditions and are required for all warrantable steel applications. For full system requirements refer to duluxpowders.com.au/warranties

3. Duratec, Charisma and Electro are only suitable for coastal, river and lake salt water environments >10m from the high tide and are NOT suitable in strongly acidic or caustic environments so the pH must be between 5 and 9.

4. Fluoroset may be suitable for coastal, river and lake salt water environments <10m from the high tide, e.g. harbours (contact Dulux for advice) and is NOT suitable in strongly acidic or caustic environments so the pH must be between 5 and 9.

For more information on specifying the right product for your project, call 13 24 99 or visit duluxpowders.com.au

Warranted Performance

All Dulux premium powder coat products are backed by product specific warranties on:

- Architectural aluminium, including perforated aluminium and expanded aluminium
- Mild steel, bright/semi bright steel, black steel and blue steel

| Warranty | Duratec | Charisma | Electro | Fluoroset |
|------------------------|---------------------------------|----------------|----------------|----------------|
| Alumi Shield™ Warranty | Aluminium Durability: 25 Years | 25 Years | 25 Years | 35 Years |
| | Aluminium Colour: 20 Years* | 15 Years | 15 Years | 30 Years |
| Steel Shield™ Warranty | Steel Corrosion: Up to 10 Years | Up to 10 Years | Up to 10 Years | Up to 10 Years |
| | Steel Colour: 20 Years* | 15 Years | 15 Years | 30 Years |

* Excluding Duratec Intensity – 15 Years.

Warranties are made up of a colour warranty (for fade and chalking), durability warranty (film integrity for aluminium only), and corrosion warranty (for steel only). They are only valid when applied by a Dulux Accredited Powder Coater to the warranty specification on recommended project types and conditions.

For more information visit duluxpowders.com.au/warranties

Dulux Accredited Powder Coaters

Only Dulux Accredited Powder Coaters are able to issue our Dulux Alumi Shield™ and Steel Shield™ warranties after demonstrating their capability to meet stringent quality conditions and international standards.

For more information visit duluxpowders.com.au/accredited

CustomColour™

Our Architectural Colour Selector cards feature our range of stocked, readily available products and colours. If you can't find the colour you require in a particular product, Dulux offer a premium CustomColour™ service. Call 13 24 99 or visit duluxpowders.com.au/custom-colour

Advice Line

Our dedicated consultants can help simplify the specification process, saving you time and money by providing the right coating advice for your project. Call 13 24 99 or visit duluxpowders.com.au

Care and Maintenance

Care and maintenance is essential for warranty compliance. To ensure the life of your asset is maximised and to comply with Dulux Alumi Shield™ and Steel Shield™ warranty requirements, a simple and regular maintenance program must be implemented and recorded in line with the Dulux Care and Maintenance of Powder Coated Surfaces brochure. Visit duluxpowders.com.au/tech-advice to view or download.
